

Instructions for audio recordings with your smartphone

Emergency number (for questions, problems or disturbances regarding the audio/video recording or data transfer): **(+43) 676 5451988**

Android smartphone:

First of all, please download the (free) app: “Audio Recorder (no ads)”

Please make the following adjustments (either prior to using the app for the first time or by accessing settings via the gear wheel)

Recording Format:

Wav

Sample rate:

48 kHz

Channel count:

Stereo

Start the recording by pressing the white record button and end the recording by pressing the stop symbol (otherwise the recording will only be paused). After pressing stop, you will be asked if you want to save the recording. Here, you can also name your recording accordingly.

You can access your saved recordings via the menu below (list icon).

Click on the three dots next to the corresponding recording.

This way you can either send the recording to your own e-mail address or download it unto your smartphone to transfer the file to your computer via data cable.

Android smartphone:

First of all, please download the (free) app: "Voice Recorder/Diktiergerät VOZ"

Click on the gear wheel to access the settings. Please make the following necessary adjustments:

Microphone Adjustment:
0,5 (meaning "half" of the possible length)

Record file type:
Wav

Recording Quality:
Stereo, 48 kHz

Start the recording by pressing the red record button and end it with the red stop symbol.

Following this, you will be asked whether you want to save the file or not, which is where you can also name your file accordingly.

You can access your saved recordings via the menu below (headphone icon).

Click on the three lines next to the corresponding recording.

This way you can either send the recording to your own e-mail address (if possible, please use the MailDrop-function) or use the AirDrop function of your iPhone. You can also transfer the file to your computer via a data cable.
